

Incident Readiness

Closing the 'Exploitation Window'

The Timeline of an Incident

Are we prepared?

% of companies with an Incident Response Plan

Most organisations lack an Incident Response Plan of any kind.

Those that do have an Incident Response Plan focus more on REACT rather than DETECT.

- Has Actionable Plan
- Has Non-Actionable Plan
- Has No Plan

What is failing?

Without alerting, there is limited awareness.

Recommendations

Request an **Incident Readiness workshop** from your security partner

Review your Incident Response plans **annually**

Work to **understand your environment**

Attempt to **confirm/validate** that security control work as required

Conclusion

- Incident Response Plans lag behind but are beginning to get airtime
- The Incident Readiness posture of most organisations is lacking
- Need to raise awareness of Incident Readiness
- Crucial to detect intrusions sooner
